Floor Score conforms with the strictest VOC and indoor air quality requirements.

#### NO TRANSITIONS

The height of our Loose Lay flooring is equal to most carpet tiles allowing the two to meet with no unsightly transitions.

#### WATERPROOF

Made for projects that include areas which are commonly exposed to topical moisture. It is ideal for wet areas such as kitchens, bathrooms, break rooms, common areas, and basements. This product is unaffected by seasonal changes in relative humidity (RH) which can damage other types of flooring over time.

#### SOUND REDUCTION

The noise reduction layer aids in providing a more pleasant sound experience within the room. It is also a critical component in minimizing the transmission of sound to the room below which is vital in high rise structures.

#### FAST INSTALLATION

Loose Lay flooring combines increased weight with a specialized backing that allows it to be installed without the use of adhesives. The increased thickness hides minor subfloor irregularities which saves time and cost on subfloor preparation.

#### LOW COST MAINTENANCE

UV cured Polyurethane finish requires no special maintenance procedures or equipment.

#### COMFORT

The increased thickness of our Loose Lay flooring improves underfoot comfort, sound reduction, and creates a warmer floor when laid over concrete.

#### ANTI-MICROBIAL FINISH

Our finish is enhanced with Nano-silver particles that kill bacteria and inhibit the growth of new bacteria on the flooring surface.
